Jack, please see the attached. Final maps with the exact GIS locations have not been developed for the soil gas, however, the locations are not significantly different than what is provided in these maps.

maps with the sampling locations for the ROST screening, VI, soil gas, drinking water, and surface water: SAP Location figures.

Excel files with the 2016 surface water: wilcox surface water SVOAs and wilcox soil and water—needs to be filtered for water.

soil gas sampling data: attached.

You mentioned you have a KMZ file with all the sampling through April 2016: attached.

Please note that no manipulation of the data can be done in google earth and all data presented primarily represents results above the lower ecological or Human health project screening number screening number.

If I missed something let me know.

Subject: Wilcox Oil Company site

Katrina,

Thanks for taking the time last week for my visit to the Wilcox site. I appreciate you providing a thorough overview of EPA's involvement and environmental sampling, and taking me around to see the site and the interesting ongoing lead sampling/XRF analysis. I was very much prepared for the EPA availability session that evening.

Following up after the site visit I reviewed my files and identified information/data that would be helpful. Can you send electronic copies of maps with the sampling locations for the VI, soil gas, drinking water, and surface water samples collected in 2016. You also had maps with the ROST screening overlaying the different areas of the site with structures. It would be helpful if you could send Excel files with the 2016 surface water and soil gas sampling data. You mentioned you have a KMD file (or was it a KML file) with all the sampling through April 2016. Can you send that file?

I would like any health issues or concerns EPA has documented at this site.

Finally, what is your timeline for getting the results of the 2017 sampling (sediment/surface water,

soil, waste, and the XRF lead sampling)?

Thanks again for all your assistance and I look forward to working with you on this site.

Jack
